Next-generation 737 airplanes (737-600/-700/-800/-900) feature a new, electronically based propulsion control system that almost completely replaces the hydromechanical systems used in earlier and current-generation 737 models (737-100/-200/-300/-400/-500). One of the principal differences is the addition of the electronic engine control (EEC), which continuously looks for and alerts flight crews to several levels of faults that could affect engine operation.

### 737-600-700-800-900 Propulsion Control System

It combines the fuselage of a 737-700 with the strengthened wings and undercarriage of the 737-800. Up to 12 fuel tanks
