Nancy Mitford was a brilliant personality, a remarkable novelist and a legendary letter writer. It is not widely known that she was also a bookseller. From 1942 to 1946 she worked in Heywood Hill's famous shop in Curzon Street, and effectively ran it when the male staff were called up for war service. After the war she left to live in France, but she maintained an abiding interest in the shop, its stock, and the many and varied customers who themselves form a cavalcade of the literary stars of post-war Britain. Her letters to Heywood Hill advise on recent French titles that might appeal to him and his customers, gossip engagingly about life in Paris, and enquire anxiously about the reception of her own books, while seeking advice about new titles to read. In return Heywood kept her up to date with customers and their foibles, and with aspects of literary and bookish life in London. Charming, witty, utterly irresistible, the correspondence gives brilliant insights into a world that has almost disappeared.

This new textbook from best-selling politics author Andrew Heywood investigates the ideas that have dominated political thinking across the globe, and examines the different ways in which they have been interpreted and reinterpreted. Written in an accessible and engaging style, it covers the key ideological traditions, offering an exposition of their history and development, their core themes and internal divisions and their impact on contemporary political behaviour, movements, parties and governments. This new introduction is written specifically for the new A Level syllabus in Political Ideas and covers all the issues and topics in the Edexcel and AQA specifications. It includes a range of useful features to help students develop and apply their understanding of ideas, ideologies and thinkers.

This revised, updated, and considerably expanded new edition provides a systematic introduction to the theory and practice of contemporary international relations. Including pedagogical features highlighting key thinkers and concepts, this text clarifies the fundamental debates and issues at stake in global political affairs.

More than three decades after her election to Parliament, Diane Abbott is still racking up firsts. The first black woman elected to Parliament, she also recently became the first black person to represent their party at PMOs. Based on interviews with her colleagues, her political opponents and friends from school and university, as well as extensive archival research, Diane Abbott: The Authorised Biography traces Abbott's path from London, via Cambridge University, through the media and radical politics into Parliament, and then to the top of Jeremy Corbyn's shadow Cabinet.

Since the early 1990s, a series of major scandals in both the financial and most especially the political world has resulted in close attention being paid to the issue of corruption and its links to political legitimacy and stability. Indeed, in many countries – in both the developed as well as the developing world – corruption seems to have become almost an obsession. Concern about corruption has become a powerful policy narrative: the explanation of last resort for a whole range of failures and disappointments in the fields of politics, economics and culture. In the more established democracies, worries about corruption have become enmeshed in a wider debate about trust in the political class. Corruption remains as widespread today, possibly even more so, as it was when concerted international attention started being devoted to the issue following the end of the Cold War. This Handbook provides a showcase of the most innovative and exciting research being conducted in Europe and North America in the field of political corruption, as well as providing a new point of reference for all who are interested in the topic. The Handbook is structured around four core themes in the study of corruption in the contemporary world: understanding and defining the nature of corruption; identifying its causes; measuring its extent; and analysing its consequences. Each of these themes is addressed from various perspectives in the first four sections of the Handbook, whilst the fifth section explores new directions that are emerging in corruption research. The contributors are experts in their field, working across a range of different social-science perspectives.
