It should be noted that Nandini has done B. Tech (Civil Engineering) from the prestigious M S Ramaiya Engineering College, Bangalore. This is also the first time that a topper has emerged from a private engineering college – a tight slap for IITs. Nandini cracked Civil Services Examination in her third attempt in CSE 2015.

How to take advantage of technology, data, and the collective wisdom in our communities to design powerful solutions to contemporary problems The challenges societies face today, from inequality to climate change to systemic racism, cannot be solved with yesterday’s toolkit. Solving Public Problems shows how readers can take advantage of digital technology, data, and the collective wisdom of our communities to design and deliver powerful solutions to contemporary problems. Offering a radical rethinking of the role of the public servant and the skills of the public workforce, this book is about the vast gap between failing public institutions and the huge number of public entrepreneurs doing extraordinary things--and how to close that gap. Drawing on lessons learned from decades of advising global leaders and from original interviews and surveys of thousands of public problem solvers, Beth Simone Noveck provides a practical guide for public servants, community leaders, students, and activists to become more effective, equitable, and inclusive leaders and repair our troubled, twenty-first-century world.

This Handbook provides a comprehensive ten-step model that will help guide development practitioners through the process of designing and building a results-based monitoring and evaluation system.

New Voices in Arab Cinema focuses on contemporary filmmaking since the 1980s, but also considers the longer history of Arab cinema. Taking into consideration film from the Middle East and North Africa and giving a special nod to films produced since the Arab Spring and the Syrian crisis, Roy Armes explores themes such as modes of production, national cinemas, the role of the state and private industry on film, international developments in film, key filmmakers, and the validity of current notions like globalization, migration and immigration, and exile. This landmark book offers both a coherent, historical overview and an in-depth critical analysis of Arab filmmaking.

The Global Film Book is an accessible and entertaining exploration of the development of film as global industry and art form, written especially for students and introducing readers to the rich and varied cinematic landscape beyond Hollywood. Highlighting areas of difference and similarity in film economies and audiences, as well as form, genre and narrative, this textbook considers a broad range of examples and up to date industry data from Europe, Africa, Asia, Australasia and Latin America. Author Roy Stafford combines detailed studies of indigenous film and television cultures with cross border, global and online entertainment operations, including examples from Nollywood to Korean Cinema, via telenovelas and Nordic crime drama. The Global Film Book demonstrates a number of contrasting models of contemporary production, distribution and consumption of film worldwide, charting and analysing the past, present and potential futures for film throughout the world. The book also provides students with: a series of exploratory pathways into film culture worldwide illuminating analyses and suggestions for further readings and viewing, alongside explanatory margin notes and case studies a user friendly text design, featuring over 120 colour images a dynamic and comprehensive blog, online at www.globalfilmstudies.com, providing updates and extensions of case studies in the book and analysis of the latest developments in global film issues.

Since the financial crisis, everyone is more aware of the need to be financially literate. This book covers a wide range of topics and assures the reader that understanding of one ’ s money script and more particularly making changes (if necessary) would result in more effective and responsible managing and handling of one ’ s financial affairs. It is a misnomer that graduates of tertiary education are financially literate or are qualified to make financial decisions. In fact, they are particularly vulnerable in making poor financial decisions as many students do not undertake courses in financial education and they therefore have limited financial knowledge. Training in financial literacy through university-based financial education programs is one method of addressing personal finances and financial stress among students. This book presents the key components of financial education designed to address the growing concerns associated with high levels of debt, abuse of credit cards, home ownership, savings and investments, risk management, and retirement. The chapters on entrepreneurship and business planning provide a roadmap for successful new ventures. The book is an excellent resource for students, those interested in developing or enhancing their understanding of money matters and financial wellbeing, and trainers involved in financial education, counseling, and planning.

Written for and by dairy and food engineers with experience in the field, this new volume provides a wealth of valuable information on dairy technology and its applications. The book covers devices, standardization, packaging, ingredients, laws and regulatory guidelines, food processing methods, and more. The coverage of each topic is comprehensive enough to serve as an overview of the most recent and relevant research and technology.

A call to reconnect the fields of urban planning and public health that offers a new decision-making framework for healthy city planning. In distressed urban neighborhoods where residential segregation concentrates poverty, liquor stores outnumber supermarkets, toxic sites are next to playgrounds, and more money is spent on prisons than schools, residents also suffer disproportionately from disease and premature death. Recognizing that city environments and the planning processes that shape them are powerful determinants of population health, urban planners today are beginning to take on the added challenge of revitalizing neglected urban neighborhoods in ways that improve health and promote greater equity. In Toward the Healthy City, Jason Corburn argues that city planning must return to its roots in public health and social justice. The first book to provide a detailed account of how city planning and public health practices can reconnect to address health disparities, Toward the Healthy City offers a new decision-making framework called “ healthy city planning ” that reframes traditional planning and development issues and offers a new scientific evidence base for participatory action, coalition building, and ongoing monitoring. To show healthy city planning in action, Corburn examines collaborations between government agencies and community coalitions in the San Francisco Bay area, including efforts to link environmental justice, residents’ chronic illnesses, housing and real estate development projects, and planning processes with public health. Initiatives like these, Corburn points out, go well beyond recent attempts by urban planners to promote public health by changing the design of cities to encourage physical activity. Corburn argues for a broader conception of healthy urban governance that addresses the root causes of health inequities.

Activists, pundits, politicians, and the press frequently proclaim today’s digitally mediated racial justice activism the new civil rights movement. As Charlton D. McIlwain shows in this book, the story of racial justice movement organizing online is much longer and varied than most people know. In fact, it spans nearly five decades and involves a varied group of engineers, entrepreneurs, hobbyists, journalists, and activists. But this is a history that is virtually unknown even in our current age of Google, Facebook, Twitter, and Black Lives Matter. Beginning with the simultaneous rise of civil rights and computer revolutions in the 1960s, McIlwain, for the first time, chronicles the long relationship between African Americans, computing technology, and the Internet. In turn, he argues that the forgotten figures who worked to make black politics central to the Internet’s birth and evolution paved the way for today’s explosion of racial justice activism. From the 1960s to present, the book examines how computing technology has been used to neutralize the threat that black people pose to the existing racial order, but also how black people seized these new computing tools to build community, wealth, and wage a war for racial justice.Through archival sources and the voices of many of those war who lived and made this history, Black Software centralizes African Americans’ role in the Internet’s creation and evolution, illuminating both the limits and possibilities for using digital technology to push for racial justice in the United States and across the globe.

Women and other oppressed and deprived people sometimes collude with the forces that perpetuate injustice against them. Women’s acceptance of their lesser claim on household resources like food, their positive attitudes toward clitoridectomy and infibulations, their acquiescence to violence at the hands of their husbands, and their sometimes fatalistic attitudes toward their own poverty or suffering are all examples of “adaptive preferences,” wherein women participate in their own deprivation. Adaptive Preferences and Women’s Empowerment offers a definition of adaptive preference and a moral framework for responding to adaptive preferences in development practice. Khader defines adaptive preferences as deficits in the capacity to lead a flourishing human life that are causally related to deprivation and argues that public institutions should conduct deliberative interventions to transform the adaptive preferences of deprived people. She insists that people with adaptive preferences can experience value distortion, but she explains how this fact does not undermine those people’s claim to participate in designing development interventions that determine the course of their lives. Khader claims that adaptive preference identification requires a commitment to moral universalism, but this commitment need not be incompatible with a respect for culturally variant conceptions of the good. She illustrates her arguments with examples from real-world development practice. Khader’s deliberative perfectionist approach moves us beyond apparent impasses in the debates about internalized oppression and autonomous agency, relativism and universalism, and feminism and multiculturalism.
