Folks, this is the RUAЕ homework booklet we are working from: H Reading. The Understanding questions should have been submitted already, and the Word Choice and Imagery questions (up to page 20) are due on Friday 13th September.

Now in its second edition, *How to Read Texts* introduces students to key critical approaches to literary texts and offers a practical introduction for students developing their own critical and close-reading skills. Written in a lively, jargon-free style, it explains critical concepts, approaches and ideas including: - Debates around critical theory - The role of history and context - The links between creativity and criticism - The relationship between author, reader and text. The new edition now includes guidance on analysing a range of multi-media texts, including film and online media as well as the purely literary. In addition to new practical examples, readings, exercises and 'checkpoints' that help students to build confidence in their own critical readings of both primary and secondary texts, the book now also offers guidance on writing fully-formed critical essays and tips for independent research. Comprehensively updated and revised throughout, *How to Read Texts* is an indispensable guide for students making the transition to university study.

to visit the nine different towns called Dublin, as well as some of the great cities and tiny hamlets in between. Along the way he wittily deconstructs the legends of a whole pantheon of Irish American heroes, from John F. Kennedy to Billy the Kid, and takes a quick detour to finally answer that most important question: was Elvis really Irish? The result is a hilarious, poignant and unforgettable book that celebrates the breathtaking diversity of the Irish influence on America and actually manages to find a town called Dublin, somewhere on the planet, that doesn't have one single pub within its limits...

This test booklet has some unique qualities. It allows the students to get an idea of the kinds of passages and the level of vocabulary used in questioning. But the uniqueness does not end there. The booklet also provides teachers and parents with the instruments that will improve the ability of the children to complete the state tests. Know that teachers and parents can begin by allowing their fourth grade children to work on passages intended for third graders and move forward and vice versa. Other grades can do the same. Everyone has the opportunity to look at the passages and questions presented to the other grades. Note carefully the approaches to the questions, because there is a specific vocabulary used in the questions. There is a wealth of writing exercises that require the students to think deeply. Building stamina is very important. Length of passages and level of difficulty are considered. Each grade is presented with one mini-test and three full length tests. The parents and the teachers can actually simulate the real test and give themselves time to identify the children's weaknesses and strengths.

Therefore, they can work on these weaknesses and reinforce concepts at the same time. At the end of every test there are additional questions designed to challenge the children and encourage the teachers and the parents to create their own questions from the passages. There is a teacher's edition that identifies the answers to all questions and the types of questions. For example, there may be questions that require the students to know main idea, author's purpose, compare and contrast and so on. These are indicated in the teacher's edition. There are writing exercises for the students to do. Useful hints relating to the kinds of responses are also presented in the teacher's edition. A suggested rubric is also included. This book is inclusive of all, including Special Needs Students who must write the same tests as other students, and whose grades and progress impact the general performance of the school.

The PISA 2006 Technical Report describes the methodology underlying the PISA 2006 survey. It examines features related to the implementation of the project at a level of detail that allows researchers to replicate its analyses.
