Introduction to IT Privacy: A Handbook for Technologists
Privacy is the ability to control what other people know about you. You can do this by saying certain things about yourself (like telling other people your address or what you like to do for fun) or doing things around other people (like going to a store with your friends and picking out what you want the most).

Information Privacy is the interest an individual has in controlling, or at least significantly influencing, the handling of data about themselves. The term 'data privacy' is sometimes used in the same way. 'Data' refers to inert symbols, signs or measures, whereas 'information' implies the use of data by humans to extract meaning. Hence 'information privacy' is arguably the more descriptive of the two alternatives.
