This book comes alive with video, audio, weblinks, slideshows, activities, hands-on experiments, and much more.

TobakkoNacht -- The Antismoking Endgame, is a frontal attack on the misuse of science and language to promote unjustified levels of smoking bans and taxes. The author, trained in statistics and propaganda analysis at Pennsylvania's Wharton School, "dissects" the scary antismoking studies that have made headlines over the past ten years. He shows clearly in each case how the data and language have been juggled to reach and promote the conclusions of those handing out the grant money and backs up his arguments with solid science clearly explained at a level that will satisfy both laymen and professionals. The book isn't all business though. It opens with a dystopian future tale of an "Endgame" in which the antismoking movement has gained full power and smokers are generally treated as near-criminals. The author explores the roots that could bring such a fiction into being and looks at the world that could be created... a very sad world indeed. The pseudo science used to push goals like outdoor smoking bans is also attacked with satire and with short essays taking the form of "Letters To The Editor" focusing on all the microarguments used by antismoking crusaders playing with their "scientific" instruments and by fanatic who'd happily apply the same methodology to reducing automobile and alcohol use. A few more formal communications showing how to approach local and national governmental bodies are also offered, again with the benefit of exposing false arguments while showing how to effectively attack the "authoritative sources" that seek to silence the opposition with their prestige while pushing for ever wider bans and ever higher taxes. The book concludes with a strong section painting a path toward a winning endgame for those in the Free Choice movement, pointing to the weaknesses of the current crop of smoking prohibitionists and suggesting how they can best be countered. TobakkoNacht can best be summed up like this: It shows how the denormalization of smokers has warped science and ripped holes in our social fabric while transforming a worthy public health effort into a destructive social force assaulting our lives, our families, and our communities -- and it shows how to fight back!

""The true horror of 1984 is not what was done to Winston Smith. The true horror was that the vast majority of the populace was happy, content, and believed that what their government was doing was right. " That quote introduces what Britain's "Numberwatch" has called, "the most astonishing political saga since the rise of Adolph Hitler." Dissecting Antismokers Brains examines the psychology and motivations that drive antismoking advocates while also analyzing their general abuse of language and science. The combination offers readers a solid foundation for understanding modern efforts to ban, tax, and harass smokers into nonexistence. Published in 2004, Brains remains ahead of its time with a startling freshness in its ideas and theories. The propaganda methods exposed here in their early development have grown and are being used even more intensively in the ads, press releases, and guidebooks of antismoking advocacy groups today. The modern stonewalling techniques examined in the author s follow-up volume, TobakkoNacht The Antismoking Endgame are shown in their birthing forms in his early communications with advocates and the callous abuse of our love for children continues to be exploited as ads show evil wisps of smoke seeking out open windows to attack babies in their nurseries. McFadden's warnings of future campaigns to deny jobs and medical care to smokers, to extend smoking bans to apartments and outdoor spaces, and to apply similar conditioning/nudging techniques to the control of alcohol and fast foods have proven far too true. For those seeking an in-depth but comfortably readable examination of the foundations of the antismoking movement, this book is essential. Its focus on the combination of psychology, propaganda analysis, and the misuse of science makes it a solid volume for college courses in the areas of social change, scientific ethics, political manipulation, and the use and limits of governmental control over citizen behavior. At the same time, its meticulous deconstruction of the basic scientific and statistical arguments fueling government-imposed smoking bans makes it accessible to anyone who's ever wondered how smoking has moved to being regularly presented as both an antisocial and even immoral character trait. Dissecting Antismokers' Brains remains an indispensable volume for anyone disturbed by, wishing to understand, or wanting to fight the growth of governmental control over personal life choices and behaviors.

An inventive, wholly original look at the complex psyche of Eastern Europe in the wake of the revolutions of 1989 and the opening of the communist archives. In the tradition of Timothy Garton Ash ' s The File, Yale historian and prize-winning author Marci Shore draws upon intimate understanding to illuminate the afterlife of totalitarianism. The Taste of Ashes spans from Berlin to Moscow, moving from Vienna in Europe ' s west through Prague, Bratislava, Warsaw and Bucharest to Vilnius and Kiev in the post-communist east. The result is a shimmering literary examination of the ghost of communism -- no longer Marx ' s " specter to come " but a haunting presence of the past. Marci Shore builds her history around people she came to know over the course of the two decades since communism came to an end in Eastern Europe: her colleagues and friends, once-communists and once-dissidents, the accusers and the accused, the interrogators and the interrogated, Zionists, Bundists, Stalinists and their children and grandchildren. For them, the post-communist moment has not closed but rather has summoned up the past: revolution in 1968, Stalinism, the Second World War, the Holocaust. The end of communism had a dark side. As Shore pulls the reader into her journey of discovery, reading the archival records of people who are themselves confronting the traumas of former lives, she reveals the intertwining of the personal and the political, of love and cruelty, of intimacy and betrayal. The result is a lyrical, touching, and sometimes heartbreaking, portrayal of how history moves and what history means.

Modern Refrigeration and Air Conditioning provides an excellent blend of theory, skill development, and service information, making it a leader in the refrigeration and air conditioning field. This comprehensive text teaches both fundamental principles and the service techniques needed to diagnose and remedy refrigeration and HVAC problems. Modern Refrigeration and Air Conditioning has been extensively updated to improve readability and address recent developments in the HVAC-R field. This new edition includes information about the latest equipment, refrigerants, and environmentally responsible service procedures. An all new layout and revised text make the book easier to read and comprehend. This Workbook is organized to follow the textbook on a chapter-by-chapter basis, providing questions to help the student review the material presented in the chapter. This supplement is a consumable resource, designed with perforated pages so that a given chapter can be removed and turned in for grading or checking.

Talented designers Jeanne Large and Shelley Wicks present a charming collection of quilts and coordinating projects. Enjoy warming your home with the seasonal beauty of autumn. Choose from 12 distinctive projects, plus a bonus online "Harvest Trio" pattern set that includes an apron, a tea towel, and a set of coasters Play with a mix of styles, such as scrappy pieced quilts and quilts featuring the authors' popular chunky applique Learn techniques for piecing, fusible applique , and wool applique

Includes a glossary of medical acronyms, and reference material on translation techniques, translation equipment, dictionaries, reference literature, and terminology management.

New insights into feminist educational leadership analyze the crossing issues of gender, school leadership, and multicultural experiences as expressed in accounts of female school principals from diverse ethnic and religious groups in the multicultural society of Israel. (Education/Teaching)
