SimNet MIS is a new computer-based tutorial program for the Management Information Systems course (MIS). It is based on McGraw-Hill ' s award-winning SimNet Xpert but has had 14 new features developed expressly for the MIS course. SimNet MIS is designed to work perfectly alongside any McGraw-Hill MIS textbook. When this valuable tool is used in conjunction with a MIS textbook, students benefit by having a learning device that allows them to practice and study their skills at home or in the school lab, at their own pace.

"Addressing the ongoing quest for teaching excellence in an increasingly technological society, the information presented in this volume addresses how to effectively implement teaching technologies across disciplinary boundaries. The scholarly dimensions of belief, inquiry, argument, and reflection in information systems are presented with attention to educational theories of metacognition, technology literacy, and community informatics. Training for e-business and public agency work are discussed to better equip instructors for the distinctive information needs of these sectors."

The Advantage Series presents the Feature-Method-Practice approach to computer software applications to today's technology and business students. This series implements an efficient and effective learning model, which enhances critical thinking skills and provides students and faculty with complete application coverage.

he Advantage Series presents the Feature-Method-Practice approach to computer software applications to today's technology and business students. This series implements an efficient and effective learning model, which enhances critical thinking skills and provides students and faculty with complete application coverage.

The Advantage Series presents the Feature-Method-Practice approach to computer software applications to today's technology and business students. This series implements an efficient and effective learning model, which enhances critical thinking skills and provides students and faculty with complete application coverage. The primary market is the Introduction to Computing/CIS computer literacy course requiring a lab component that covers software applications. Other course areas include Adult and Continuing Education/ Individual Application courses, which are one-credit hour, designed to provide a brief introduction to a single software application.

An introduction to Windows XP, which seeks to enhance critical thinking skills and provide students with complete application coverage. There are Feature, Method and Practice boxes to prepare students for skills assessment, and end-of-chapter exercises and reviews.
